

This idea of allowing cell phone usage aboard commercial aircraft is an absolutely insane idea! Has anyone done the research regarding incidents on board a/c "without" cell phones? The problems are there NOW with people drinking ALCOHOL, crammed tightly next to each other in undersized seats, fatigued, rude, obnoxious, etc. Think about it! You add more chaos to this recipe and it is seriously a disaster waiting to happen. Apparently the authors of this idea never or rarely fly. If they were frequent flyers, sitting in a cramped seat in the economy section or even first class, they would know that there are ENOUGH problems with that many people crammed in to a small space for that length of time. People do not have the good manners and discipline needed to allow cell phone usage on commercial aircraft. BAD IDEA!!!!

Thank You.
